

Improving Economic Analysis of Small Boat Harbors

Status:

In Progress

IWR Contact:

Theodore Hillyer (Theodore.M.Hillyer@usace.army.mil)

Purpose:

The overall study was initiated in FY 2003; the current action on the Opportunity Cost of Time (OCT) was initiated in FY 2004. Data to economically justify small boat harbors is not readily available, especially in Hawaii and Alaska. The study will develop an approach that measures the OCTY for these type projects. Contractors report is currently under review by IWR and HQ. Funding of additional activities may be a problem.
